

# Water has its limitations

## The evolution of emergency chemical splash treatment has arrived

Enhance your company's Chemical Accident Response Management Program while safeguarding your employee's well-being by using the next-generation chemical splash treatment, Diphotérine®.

**PREVOR**  
ANTICIPATE AND SAVE  
Toxicology Laboratory & Chemical Risk Management

The main benefits of rinsing with Diphotérine:

- Diphotérine® is a "Polyvalent" spray solution, capable of stopping chemical reactions on 6 types of agents;
  - Acids • Bases • Oxidisers • Reducers • Chelators • Solvents
- Diphotérine® unlike water or saline will stop the penetration of the chemical

To decontaminate the skin, there are different sizes of sprays according to the size of the splash surface:

### DAP

(Autonomous Portable Shower):  
5 litres for the entire body

### MINI DAP

200 ml for a limb or the torso

### MICRO DAP

100 ml for one hand or one face

For more information, including research papers, specific chemical laboratory tests, and testimonials please visit [www.prevor.com/EN](http://www.prevor.com/EN).

Prevor Diphotérine® is available exclusively in Canada at Levitt-Safety.
