

# POWER GENERATION AND UTILITIES SERVICES

## NO INDUSTRY IS AS TIED TO OUR MODERN LIFESTYLES AS POWER AND UTILITIES.

From providing electricity, water, natural gas and communications, these services are the lifeblood of our society. Canada's power generation and utilities workers are tasked with keeping these critical services running, and are exposed to a variety of deadly hazards each and every workday. Arc flashes, electrical shocks, falls, thermal burns, natural elements, water, gas, vehicles, confined spaces and heights are just some of the dangers that pose a real threat to the health and well-being of workers

We want our customers to be confident in knowing that they're working with a business that understands these industry risks and is able to provide solutions for every hazard they're up against.

Levitt-Safety provides the widest range of safety products, services and training programs, all designed to meet the unique needs of the power generation and utilities industries.

# COMMON HAZARDS IN THE POWER GENERATION AND UTILITIES SERVICES:

ARC FLASH AND ELECTRICAL SHOCK

WORKING AT HEIGHTS

DROPPED OBJECTS

AIR QUALITY

ROADSIDE SAFETY

THERMAL BURNS
