BENEFITS

LESS DOWNTIME & MAINTAINED PRODUCTIVITY

FAST ON-SITE DIAGNOSIS & REPAIR

IMPROVED EQUIPMENT UTILIZATION

EXTENDED EQUIPMENT LIFE

Our Mobile Respiratory Protection Services vehicle is equipped to perform the inspection, maintenance, and certification needed to keep your respiratory equipment and breathing air in safe working order, all in a significantly shorter timeframe than returning them to an authorized facility.

CAN/CSA Z94.4-11 states self-contained breathing apparatuses require flow-testing and visual inspections of all breathing air cylinders annually.

CSA Also States:

- ✓ Breathing air must be replaced annually
- ✓ Hydrostatic testing is required every three (3) years for fibreglass or Kevlar full wrapped and hoop wrapped cylinders
- ✓ Hydrostatic testing is required every five (5) years for steel, aluminum, and carbon fibre cylinders

Our factory trained & certified technicians are authorized to work respiratory products from:

- ✓ Scott
- ✓ Honeywell
- ✓ MSA
