The Construction Industry Averages

11.2 LOST-TIME DAYS A MONTH

The construction industry in **CANADA** is **BOOMING**, but it unfortunately accounts for the highest number of **WORKPLACE INJURIES** every year. Learn how you can **STAY SAFE** on the job with these tips!

Of yearly workplace fatalities are in the construction industry

OF INJURIES IN THE CONSTRUCTION INDUSTRY OCCUR DURING THE FIRST YEAR ON THE JOB

IMPROPER USE OF PPE AND LACK OF TRAINING LEAD TO THE INDUSTRY'S SHOCKING INJURY RATES

SAFETY TIPS

Review and practice proper lock-out-tag-out procedures

Always wear the PPE required for your work – that includes hard hats, gloves, safety footwear, and fall, eye and face protection

Always wear your respirator if one's required – and make sure it's properly fitted

Protect your eyes and ears from dust, debris, vibration and noise

Make sure first aid kits and fire extinguishers are always on hand

Proper training can help reduce injury rates
