Hard-surface disinfectants and hand sanitizers (COVID-19): List of disinfectants with evidence for use against COVID-19

[Overview](#)[List of disinfectants \(COVID-19\)](#)[List of hand sanitizers](#)[Information for manufacturers](#)[Products accepted under interim measure](#)

Note: This list is updated regularly, so please check back often.

All disinfectants that have a drug identification number (DIN) have been approved for sale in Canada. While most disinfectants will work against coronavirus, the following list of hard-surface disinfectants are supported by evidence following drug review, demonstrating that they are likely to be effective and may be used against SARS-CoV-2, the coronavirus that causes COVID-19. The disinfectants on this list are expected to be effective against all strains of SARS-CoV-2, as genetic changes to the virus are unlikely to impact the efficacy of disinfectants.

Inclusion on this list does not constitute an endorsement by Health Canada. This is not a comprehensive list of all disinfectants and cleaning products that may be appropriate for use in public, institutional and household spaces. We will update this list with additional products as evidence is provided from industry applicants.

How to find out which products are on Health Canada's list of hard-surface disinfectants with evidence against COVID-19

1. Locate the Drug Identification Number (DIN) on the disinfectant product label
2. Look for that number on the [Disinfectants for Use Against SARS-CoV-2 \(COVID-19\) list](#)

For more information on Health Canada's emerging viral pathogens approach for hard-surface disinfectant drugs, contact the Natural and Non-prescription Health Products Directorate at hc.nnhpd-dpsnso.sc@canada.ca.

You can find more information on all other approved disinfectants and other drug products on our searchable [Drug Product Database](#).

SAFETY DATA SHEET

All Clean Ultra Disinfectant Spray

General information

Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves.

5. FIRE FIGHTING MEASURES

Suitable extinguishing media

Water fog. Foam. Dry chemical powder. Carbon dioxide (CO₂).

Special protective equipment and precautions for firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Firefighting equipment/ instructions / specific hazards arising from chemical

In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk. Heating may cause release of hazardous gas.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures.

Use personal protective equipment as required.

Methods and material for containment and cleaning up

Prevent further leakage or spillage if safe to do so.

Methods for clean-up

Small spills: Mop up and flush away with water or absorb and incinerate

Large spills: Contain spill. Soak up spilled material with inert absorbent material and place in a properly marked closed container for proper disposal

7.0 Handling and storage

Precautions for safe handling

Handle in accordance with good industrial hygiene and safety practice. Do not breathe mist or vapor. Do not get in eyes, on skin or on clothing. Avoid prolonged exposure. Do not taste or swallow.

Conditions for safe storage, including any incompatibilities

Keep containers tightly closed in a dry, cool and well ventilated space. Do not let containers freeze as they may spill or rupture.
Do not mix with oxidizing agents such as bleach, anionic soaps and detergents.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Biological limit values

No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

Individual protection measures, such as personal protective equipment

Eye/face protection

Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection

Wear protective gloves.

Other

Wear suitable protective clothing.

Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
